ELSEVIER International Journal of Mass Spectrometry and Ion Processes 155 (1996) 193–195

Subject Index

Alkali metal ions
Ion/neutral mass spectrometry of thermal ionizers: application to ionization mechanisms from zeolites 149
Aromatic and non-aromatic halocarbons
The reactivity of slow electrons with molecules at different degrees of aggregation: gas phase, clusters and condensed phase 1
Arrhenius plots
Isomerization of 1,6-dimethylcyclohexadienyl cations obtained in the gas phase from insertion of *ortho*-tolylium ions into methane at 1–3 atm pressure. Does it involve excited or thermal species? 185
Atomic clusters
The dissociation channels of silver clusters Ag_n^+, $3 \leq n \leq 20$ 141

Binary clusters
Mass distribution of sulfide cluster ions, $X_nS_m^{\pm}$(X=C, Si, Ge) 79
Borinium ion affinity
Comparison of cation binding affinities of quinones 123

C_{60}
The reactivity of slow electrons with molecules at different degrees of aggregation: gas phase, clusters and condensed phase 1
Chemical ionization
Reactions of SiF_5^- with atmospheric trace gases: ion chemistry for chemical ionization detection of NHO_3 in the troposphere 133
Cluster anions
The reactivity of slow electrons with molecules at different degrees of aggregation: gas phase, clusters and condensed phase 1
Clusters
Secondary cluster ion distributions produced by MeV ion impacts on Group IIA oxides and nitrates 89
Collision-induced dissociation
The dissociation channels of silver clusters Ag_n^+, $3 \leq n \leq 20$ 141

Cross-sections
Cross-sections for the formation of S^- ions by electron impact on OCS 99
Cyclohexadienyl cations
Isomerization of 1,6-dimethylcyclohexadienyl cations obtained in the gas phase from insertion of *ortho*-tolylium ions into methane at 1–3 atm pressure. Does it involve excited or thermal species? 185

Direct insertion probe
Modification of a Hewlett-Packard 5971/5972 MSD to accept a direct insertion capillary membrane probe 107

Electron attachment
Cross-sections for the formation of S^- ions by electron impact on OCS 99
The reactivity of slow electrons with molecules at different degrees of aggregation: gas phase, clusters and condensed phase 1
Electron stimulated desorption
The reactivity of slow electrons with molecules at different degrees of aggregation: gas phase, clusters and condensed phase 1

Flowing afterglow
Reactions of SiF_5^- with atmospheric trace gases: ion chemistry for chemical ionization detection of NHO_3 in the troposphere 133
Flow tube
Selected ion flow tube studies of the gas-phase reactions of $O^{\cdot-}$, $O_2^{\cdot-}$ and OH^- with a variety of brominated compounds 163

Gas phase ion chemistry
Selected ion flow tube studies of the gas-phase reactions of $O^{\cdot-}$, $O_2^{\cdot-}$ and OH^- with a variety of brominated compounds 163
Gas-phase basicity
Comparison of cation binding affinities of quinones 123

Group IIA nitrates
Secondary cluster ion distributions produced by MeV ion impacts on Group IIA oxides and nitrates 89
Group IIA oxides
Secondary cluster ion distributions produced by MeV ion impacts on Group IIA oxides and nitrates 89
Group IVA elements
Mass distribution of sulfide cluster ions, $X_nS_m^{\pm}$(X=C, Si, Ge) 79

HCO_2H
Reactions of SiF_5^- with atmospheric trace gases: ion chemistry for chemical ionization detection of NHO_3 in the troposphere 133
HNO_3
Reactions of SiF_5^- with atmospheric trace gases: ion chemistry for chemical ionization detection of NHO_3 in the troposphere 133

Instrument modification
Modification of a Hewlett-Packard 5971/5972 MSD to accept a direct insertion capillary membrane probe 107
Intramolecular isomerization
Isomerization of 1,6-dimethylcyclohexadienyl cations obtained in the gas phase from insertion of *ortho*-tolylium ions into methane at 1–3 atm pressure. Does it involve excited or thermal species? 185
Ion cyclotron resonance
The dissociation channels of silver clusters Ag_n^+, $3 \leq n \leq 20$ 141
Ion/neutral mass spectrometry
Ion/neutral mass spectrometry of thermal ionizers: application to ionization mechanisms from zeolites 149
Ion/surface reaction
Chemical transformations of self-assembled monolayers by low energy reactive ion beam bombardment 69

Kinetics
Selected ion flow tube studies of the gas-phase reactions of O^-, O_2^- and OH^- with a variety of brominated compounds 163

Laser ablation
Mass distribution of sulfide cluster ions, $X_nS_m^{\pm}$(X=C, Si, Ge) 79

Ligand exchange
Comparison of cation binding affinities of quinones 123
Low energy ion beams
Chemical transformations of self-assembled monolayers by low energy reactive ion beam bombardment 69

Magic numbers
Secondary cluster ion distributions produced by MeV ion impacts on Group IIA oxides and nitrates 89
Mass spectrometry
Mass distribution of sulfide cluster ions, $X_nS_m^{\pm}$(X=C, Si, Ge) 79
MIMS
Modification of a Hewlett-Packard 5971/5972 MSD to accept a direct insertion capillary membrane probe 107

Negative ions
Cross-sections for the formation of S^- ions by electron impact on OCS 99

Penning trap
The dissociation channels of silver clusters Ag_n^+, $3 \leq n \leq 20$ 141
Photoelectron spectroscopy
Chemical transformations of self-assembled monolayers by low energy reactive ion beam bombardment 69
Pressure effects
Isomerization of 1,6-dimethylcyclohexadienyl cations obtained in the gas phase from insertion of *ortho*-tolylium ions into methane at 1–3 atm pressure. Does it involve excited or thermal species? 185

Quadrupole ion trap
Comparison of cation binding affinities of quinones 123
Quinone
Comparison of cation binding affinities of quinones 123

Self-assembled monolayers
Chemical transformations of self-assembled monolayers by low energy reactive ion beam bombardment 69

SiF_5^-;
Reactions of SiF_5^- with atmospheric trace gases: ion chemistry for chemical ionization detection of NHO_3 in the troposphere 133
SIFT
Selected ion flow tube studies of the gas-phase reactions of $O^{\cdot-}$, O_2^- and OH^- with a variety of brominated compounds 163
Silver ions
Ion/neutral mass spectrometry of thermal ionizers: application to ionization mechanisms from zeolites 149
Stability and fragmentation of clusters
The dissociation channels of silver clusters Ag_n^+, $3 \leq n \leq 20$ 141
Sulfide
Mass distribution of sulfide cluster ions, $X_nS_m^{\pm}$(X=C, Si, Ge) 79
Surface modification
Chemical transformations of self-assembled monolayers by low energy reactive ion beam bombardment 69

Thermal ionization
Ion/neutral mass spectrometry of thermal ionizers: application to ionization mechanisms from zeolites 149
Thermal vs. electrostatic activation
Isomerization of 1,6-dimethylcyclohexadienyl cations obtained in the gas phase from insertion of *ortho*-tolylium ions into methane at 1–3 atm pressure. Does it involve excited or thermal species? 185
Time-of-flight mass spectrometry
Secondary cluster ion distributions produced by MeV ion impacts on Group IIA oxides and nitrates 89

Zeolites
Ion/neutral mass spectrometry of thermal ionizers: application to ionization mechanisms from zeolites 149
